ClearRay™ 1700

Integrated with MasterX™ system
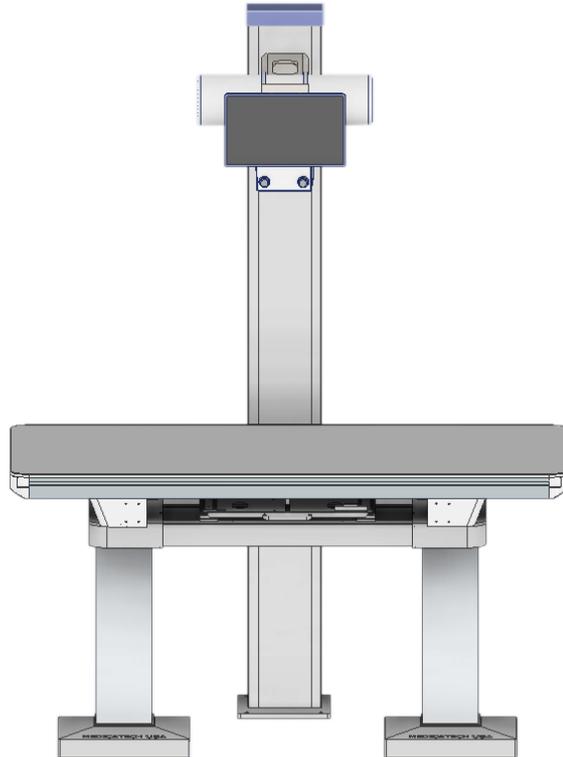

A feature-rich veterinary X-ray system built with lightweight materials for durability and easy maintenance. The customizable 4-way float-top table enhances workflow efficiency. The Clear Ray 1700 stands out in the market with its unprecedented open-floor design, making it highly adaptable to any veterinary environment.

ClearRay™ 1700

Sturdy high quality construction with tube column able to fit low ceilings.

Open table platform for convenience and easy cleaning.

Electromagnetic Breaking System of table.

Large 4 way float top table (31" x 60") with wide lateral range — 500 lb max

One touch foot control function for easier patient positioning

FOCUS
Technology

Optical Signal Image
Reaching TFT Detector
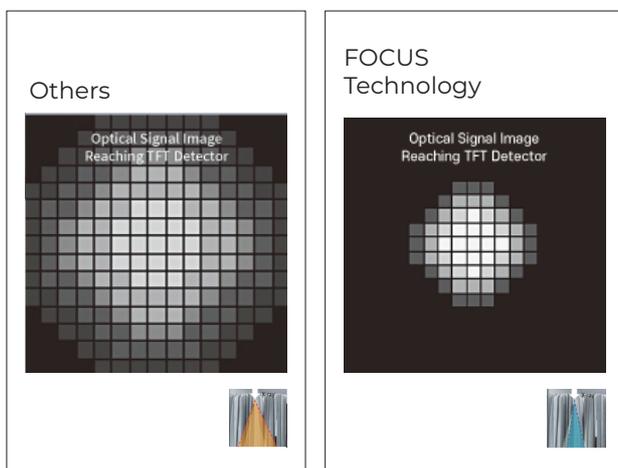

FOCUS Scintillator Technology

FOCUS (Fluorescent Optical CsI Upgraded Structure) has more focused optical signal compared to conventional CsI. As a result, ultra low noise is achieved by FOCUS technology.

Single LAN Cable

With a single Lan cable, installation and maintenance of detectors become more simplified. The elimination of interface box allows easier and faster installation.
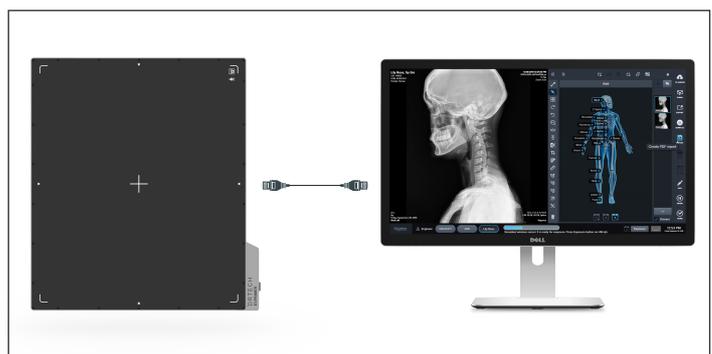

Voyance®

By Medicatech USA®

An industry leading complete software suite that delivers a secure and cost-effective way to acquire, view and share DICOM Images. Voyance® is one of the easiest, most user friendly interfaces. Its modern design & attention to the user experience along with its and features & functions make it a great tool to every user.

- **Instant installation and auto-configuration**
- **Easy, user-friendly Modern user interface**
- **Interface consistency across acquisition and viewing platforms**
- **Optimum Workflow designed for efficiency**
- **ClairVoyance® Image Processing Algorithm**
- **Supports a wide range of detectors and generators**
- **X-RAY Generator integration (CPI & DRGEM)**
- **Auto Stitching and Auto Cropping**
- **Side by side comparisons**
- **Fully DICOM 3.0 Compatible: MWL, MPPS, and all DICOM ops.**
- **Reject Analysis**
